

Sustainability in UniTo

Our **Sustainability Reports** narrate how the human, intellectual, natural and relational capitals are embedded in UniTo and **show the sustainability performance of the university**. They disentangle the complex managerial governance that supports knowledge production and the achievement of social responsibilities, following a defined strategic plan.

The Reports have been edited using the GRI (Global Reporting Initiative) guidelines version G4, Core “in accordance”.

Main issues are:

Economic sustainability

Social sustainability

Environmental sustainability.

**Università
di Torino**

Economic sustainability

It consists of economic value generated and attracted, Economic value distributed to relevant stakeholders, Indirect economic distribution, Proportion of spending on local suppliers and GDP generated by UniTo in proportion to public funds received.

Social sustainability

It refers to human resources and gender distribution, UniTo's students, UniTo attractiveness, UniTo graduates, Removal of economic and social obstacles which limit access to the right of higher education, Integration of disabled students, UniTo fosters the employability of its student.
